

# A Bigger splash

A hydrating solution  
for dry irritated skin

## Ultrabase<sup>®</sup>

### CREAM

NEW AND  
IMPROVED  
FORMULATION

Ultrabase<sup>®</sup> Cream is  
an emollient cream  
which may be used for a wide  
variety of dry skin conditions

# Ultrabase<sup>®</sup> CREAM

White Soft Paraffin 10% w/w

Ultrabase<sup>®</sup> Cream can be used to reduce the redness and itchiness of skin problems especially those typically associated with eczema and psoriasis. Its soothing emollient properties and gentle oils can help protect against dry and irritated skin conditions and may leave skin feeling hydrated and nourished.

With its pleasant, non-clinical scent, Ultrabase<sup>®</sup> Cream is a popular alternative for those who want to be able to enjoy their emollient, particularly if there is an increase in the number of applications.

Additionally, it may be alternated with topical corticosteroids when the latter are being gradually withdrawn and may be continued alone after complete withdrawal of the topical corticosteroid.

## Ultrabase® Cream is a formulation, based on over 40 years of experience in treating dry skin conditions.

- Pleasant, non clinical scent
- Does not contain Sodium Lauryl Sulphate (SLS)
- Paraben free
- Non-greasy feel
- Airless pump dispenser

Soothes and hydrates dry skin on the hands and body

Locks in moisture

Absorbs easily

Pleasant aroma

Easy to use

**NEW  
PRICE**

Ultrabase® Cream is an established, premium emollient cream and is reimbursable from Part IX of the Drug Tariff. It is competitively placed in the emollient market.

### ULTRABASE<sup>®</sup> Cream - Abbreviated Prescribing Information

**Presentation:** Ultrabase<sup>®</sup> Cream is a white cream containing soft white paraffin 10% w/w. **Uses:** Ultrabase<sup>®</sup> Cream is a moisturising cream that can be used in the relief of the symptoms of dry skin conditions associated with eczema, psoriasis and other commonly occurring skin conditions where dry skin is a component. **Dosage:** The cream should be smoothed onto the skin as often as required. **Contraindications:** Do not use if you know you are hypersensitive (allergic) to any of the ingredients. **Precautions:** Contains stearyl alcohol which may cause local skin reactions. Benzoic acid may cause an allergic skin reaction (possibly delayed). **Warning:** Do not smoke or go near naked flames while applying this product as there is a risk it might ignite and cause severe burns. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns more easily and is a serious fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it.

**Side Effects:** Hypersensitivity skin reactions including redness and itching have been reported. **Package Quantities:** 500ml pump dispensers.

**Basic NHS Price:** £7.01

Ultrabase<sup>®</sup> Cream is a Class 1 Medical Device. It is produced by Derma UK Ltd, Toffee Factory, Ouseburn, Newcastle upon Tyne NE1 2DF, UK. "Ultrabase" and "Derma UK" are registered Trade Marks.

**Date of Revision of Text:** June 2021.

Adverse events should be reported. Information about adverse event reporting can be found at [www.mhra.gov.uk/yellowcard](http://www.mhra.gov.uk/yellowcard). Adverse events should also be reported to Derma UK Ltd, UK on 0191 375 9020.

**Date of Preparation:** June 2021.
