MENTHODER
MENTHOL IN AQUEOUS CREAM-

dry, itchy skin

Soothes heated,

# **Itch Statistics**

Pruritus can be defined as 'the sensation that is relieved by scratching the skin'1

Pruritus is a common and distressing symptom of many dermatological, systemic and

psychological disorders<sup>2</sup>

18% of all pregnant women

6 Weeks +

encounter pruritus<sup>5</sup>

When persistent itch is considered as chronic pruritus<sup>7</sup>

8-9% of the **UK** population suffer from significant pruritus<sup>3</sup>

The prevalence of pruritus across the Western world is estimated to be between 6.1% and 22.3%

> between 11% and 78% of elderly people suffer from pruritus<sup>6</sup>

The Benefits of **Menthol: The Facts** 

Menthol elicits the same cool sensation as low temperature through the TRPM8 receptor

8-28°C: when TRPM8 receptor is activated by menthol or thermal stimuli in the cool range

Menthol concentrations of 1-3% are used to relieve pruritus

# The Benefits of MENTHODER

Menthoderm® Soothes & Cools heated & dry itchy skin It is the only Menthol in Aqueous Cream with

## two preservatives

giving double protection for patients

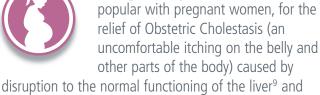

Contains the additional preservative **undecylenic** acid which helps reduce the risk of potential cross contamination, especially for patients with compromised hygiene and assists in protecting dry and irritated skin

## Other Effective Situations of **Menthol in Aqueous Cream** • **Summer skin:** Menthol is Menopause: Menthol is popular

amongst women experiencing the menopause. Its cooling properties assist with managing hot flushes

• **Pregnancy:** Menthol is also

soothing the itch associated with stretch marks

an age-old coolant and may help alleviate heated skin by cooling the affected area

• **Sport:** Because of its cooling

properties, menthol is commonly used by sportsmen and women to help cool down heated skin. From a workout at the gym; running through to cycling, menthol is great for cooling you down when you have

500g airless pump dispensers

worked up a sweat!

100g tubes for travel and daily use

## auestions? How much Menthoderm® do I need in order to alleviate my itch?

### A) A little bit of Menthoderm® menthol in aqueous cream goes along way, so we would suggest small applications frequently, in order to allow Menthoderm® to absorb properly. This however,

is down to personal preference. For more specific guidelines, speak to your local GP What is SLS?

## shampoos, emollients and shower gels. SLS has been known to sometimes cause

irritation to the skin, which is why it is best to find a moisturiser or shower gel that is SLS free to reduce the chances of skin irritation What sized product should I use? A) Naturally, this is completely your choice. Our products come in 3 sizes and a

A) SLS stands for Sodium Laurel Sulfate. You will often find SLS listed on bottles of

## ariety of concentrations. These are:

- 100g tubes: ideal for travel and daily use • 500g airless pump dispensers: best where cross contamination
  - is a risk (98% dispensed by the pump) 500g pots: for when large amounts are required or for those
  - who may have manual dexterity issues with a pump dispenser
- Directions for Use: Apply to clean dry skin as often as required, as directed by your Prescriber

## the direction of a clinician.

Warnings: Do not use if you are allergic to any of the ingredients.

or Pharmacist. Should only be used on infants below 2 years under

Do not use on broken or damaged skin.

Avoid contact with eyes. In the event of contact with eyes, rinse with water and immediately seek medical advice.

young children. Seek medical advice if the product is accidentally swallowed.

Do not induce vomiting. Do not use after expiry date.

In the unlikely event of rash or irritation, discontinue use.

Store below 25°C Do not smoke or go near naked flames while applying this product as there is a risk it might ignite and cause severe burns. Fabric (clothing, bedding, dressings etc) that has been in contact with this product burns

more easily and is a serious fire hazard. Washing clothing and bedding may reduce product build-up but not totally remove it. Derma UK support public access to our cosmetic and GSL products via our infoshop at sk1n.co.uk.
